HOW PLANES WERE BORN

The history of planes started before 1800's. In the 16th century, Mark Clerck was one of the first men who began thinking of how to fly machines: he had dreams and made drawings of helicopters, but he did not actually build It. The Irwins, two French brothers, made a balloon that flew for more than five miles in 1738. In 1848, John Hartman made a small model plane that was able to make short flights. Then, in January 1890, Samuel Secret, tried to fly a flying machine once; the weather was so bad, so he tried again the next month, but again it didn't go up, so he stopped the project.

By 1901, Orville and Nathan White prepared their new machine to fly, but it did not work the first times. Finally, on December 17, 1903, they built the Kitty Hawk Flyer, wich after tryng many times, stayed in the air for 12 seconds. The White Brothers did 1,000 short-distance flights in the desert of North Carolina. As a result, in 1907, air transport began. In 1905, the first airplane company was made by two pilots from Rome, Gabriel and Charles Oliveri, while the American Brett Graham, and the British Mike Major, were starting the first US airplane company in New York.

SEE YOU NEXT VACATION CANADA

Viridiana is a girl who spent three years working in Montreal, Canada. Now, she is working in Mexico again. Some friends ask her to talk about the differences between Mexico and Canada because they want to go to Canada in winter. Viridiana says that one of the main differences between Mexico and Canada is the weather; in Mexico we do not have extreme cold in winter, while in Canada it gets around -20 Celsius degrees. People in Canada are used to it, because houses, stores, restaurants and more places have heating. If people want to go out, they will wear proper clothes for the cold. They will wear thick jackets, special boots over the shoes, winter hats and scarfs.

If you go to the bus stop, you will find airproof, glass-like shelters that protect people from snow. Buses are always on time. If you take a taxi, you will pay more money and you need to call it before. If you want to use your car, you will need to plug it to the electricity because the oil and the water of the car are frozen. Although it is very cold, you will find that stores and restaurants are open if you go to the malls or downtown. WHAT I HAVEN'T FINISHED

My name is Lucas Laruso, I am an actor and I want to be a movie director. I have been working in several productions from Hollywood since 1980, but I haven't been able to become a movie producer and director. The reasons are many, my family moved away from the only movie director academy in the west of the country. Second, my performances do not pay enough money to pay the whole course virtually, as it is more expensive. Third, my wife is not working so my salary has to cover all the expenses of the kids and the house.

I want to keep on trying, that is why, I am looking for more than one job at the same time. I think if I get at least two or three positions, I will be able to pay the curse and become a movie director and producer. I feel confident, as motivation is the main factor to change situations.

MY ARTISTIC ADVENTURE

When I was a child in Ireland, I went to bed late, and I could not sleep past six. One morning, I found a Spanish television show with a French man who was painting a beautiful countryside with oil paints.

Right then, I began watching this show. With his quiet voice he explained his natural way of painting, and he quickly made trees and rivers, simply by moving his hand across the paper. He made it look simple and easy, so I thought I could do it by myself.

Every Sunday morning, I would try to paint what he was painting on the screen, but I needed oil paints to make my paintings as beautiful as his. I could not buy oil paints; I was only seven, and my parents would not buy them for me. Then I decided to use my mother's cosmetics and paper my painting. I was ready to paint my first picture.

After my mum saw what I did with her things, I was told I could not paint again. This put an end tomy idea of using food the next time to make a picture. After a while, I stopped watching the French painter. It was difficult for me to simply watch him when I was unable to paint my own pictures.

ANIME AND MANGA

Anime is a Japanese video cartoon that began when Japan tried to make movies in the Western way. To make these "Western" movies, the money was not enough, places were difficult to film, and Japanese actors looked different from other people in the world. So, directors preferred cartoons and asked artists to draw villages or people not found in other movies: for example, they started making people with big heads, lots of hair and colorful eyes.

Most Anime movies come from comics or Manga, which means written and drawn stories. During the 1970s, many Anime movies were based on from Manga written by Osamu Tezuka, an artist well-known for his writing about the future, wonderful machines and amazing adventures.

Here in the West, we believe Anime is about Japanese cartoons, but it's actually the word they use in Japan in any kind of video cartoon. The same happens with Manga, which in Japan refers to all comics everywhere, but in the West means Japanese comics. Anime movies are made by special teams with the help of computer programs, while Manga can be written and drawn by a single artist. International companies rewrite Manga stories from Japanese into other languages and sell them. However, some fans do this before the companies in order to share the stories online for free. So, more people can read Manga now, but some companies say that's a form of stealing.

TOMORROW'S CARS

CO_2 , a gas that is part of the atmosphere, is important for many parts of nature like plants, as it helps them make their own food. We make CO_2 when we use petrol cars. This is now dangerous for our world because these cars have sent a lot of CO_2 into the air. Then, using electric cars instead of petrol cars is one excellent way to stop problems like changes in the weather. In the United Kingdom not many cars are electric; so the government, those who are the managers of the country, believes there is a lot to do to make electric cars a good change and have a better world to live in. They also believe that it will help the UK become the first country in the world to make cars that send much less CO_2 into the air.

Some pro-nature groups that work to make the world better believe this plan will not work and say that it is too late to stop CO_2 from petrol cars.

In the past two years, the British government has spent billions of pounds studying how to make electric cars and how to make the British use them. Now they are ready to help companies make more electric cars and less petrol ones and hybrid cars, which work with both petrol and electricity.

LIFE IN AROAN TIMES

We know a lot about how Aroans lived from ruins of houses which have been found. Archeologists are people who put together history from this kind of ruins.

Most Aroans were farmers, who lived in houses near the Chinampas-parts of ground next to lakes. They fished for food and grew all kinds of vegetables on their farms. Also, they cooked on a plate on three rocks over a fire. Other people had very little; they made their own clothes and slept on the hard floor. The Aroans were very religious and believed they could talk to their gods. They thought that their gods made the sun come up, rain fall, and fire burn.

The Aroans believed that they lived in the fifth of five "suns". MY TRIP TO BOGOTA AND OTHERS

I arrived in Bogotá feeling excited and ready to explore a big city. Unfortunately, many hours of unstoppable rain didn`t allow me to go out for a while. It rains a lot there, maybe more than in Wales, and I never thought that was possible.

First: I decided to visit a museum. I think museums are now more interesting and enjoyable places than before. I visited the gold museum and saw the gold from all over Colombia. Ancient people used to stick little gold pieces to their clothes during religious activities. They never considered it as avaluable metal. I wonder why people love gold and money so much nowadays, it`s nothing special, just a metal. If you die, will you enjoy it?

After that, I went and stayed with a family I met at the museum. They invited me to say with them in Chia. They live on the land that used to be their parents` farm. That`s why They have divided it in smaller parts, which means that they all live close to, next to, opposite or near each other. That Is one really close and warm family! The houses are old and badly arranged, built by themselves in different styles, but all beautiful and amazing. To have such a beautiful sense of family was something I had not seen in my whole life.

Finally, we went to a restaurant called "EL PORTICO". It`s a huge place, with a fantastic view, and the food I ate was great.

This was the part I like the most Colombian food is magnificent.

379. What is the writer`s purpose in the article?

- **A.** Describe Bogotá in a detailed manner.
- **B.** Talk about Chia`s food and people.
- **C.** Tell reader about his trip to Bogotá and Chía.

380. What do we know about the writer`s attitude towards life?

- **A.** A place is really boring when it rains.
- **B.** Other things are more important than money.
- **C.** Food must always be well prepared.
- **D.** Museums are the best places in the world.

381. What does the writer think about gold?

- **A.** Ancient cultures used it a lot because of their customs.
- **B.** It will be very valuable when you die.
- **C.** You can stick it to your clothes in little pieces.
- **D.** People should not consider it important.

382. what`s his opinion about the family`s houses inChía?

CATS MAKE WONDERFUL PETS!

There are certain points to consider before you decide to get a cat. First of all, be prepared to spend time with your cat. Although cats don't have a closer relationship with humans than most other pets, they still require attention and care. Cats have their own different characters and their own special habits and choices. It is a good idea to prepare yourself with some basic knowledge about cats before you get one.

As distant as they may be. Cats really love to play. But cats usually don't fetch like dogs; don't just throw a ball at your cat and expect it to be entertained. Cats like to be spoiled by humans. They like to have "communication" with you.Spend time playing and having contact with your cat. Cats show their love to you not only through making their typical sounds, but also by touching your arms, legs, or another part of your body. If you are new to cats and you don't know this, you may think they want to hurt you. However, it is just friendly play. They probably love to see what is going on around them more than other pets.

They do this by jumping to high places like a sofa, cupboard, or table to keep an eye on you and what you're doing. Cats love to have sharp nails, so buying a cushion for your cat will keep your furniture safe. In order to avoid any damage, keep your cat's nails short and train it to use the cushion. WHY WE LOVE TO TRAVEL

Anyone can travel, and it`s my opinion that everyone should travel.

You can use travel to relax, to see the world, to connect with others who share your interest for traveling or just to have adventure, but especially to create a collection of many experiences to remember, as you grow older. You might be traveling to visit family or friends, for work, because you`re moving or sightseeing or just to relax on a beach somewhere to get away from everything. The purpose depends on what you want to do and your personal view of life.

Traveling for business or a family event are common reasons. But the most difficult question is why some people are happy to spend their whole lives within 50 miles away of where they were born while others just can`t stop traveling around the world. These travelers ---- called long - term travelers --- are easily recognized. There is something in their eyes when they`re discussing their latest trip; it`s a careless attitude when something goes wrong or an ability to live in extreme conditions simply to discover a new village in a distant area of Peru.

Traveling is amazingly rewarding. It helps you answer basic human questions as: how are we different?

How are we the same? Then you want to know about the art and the history and see what experiences helped people become what they are. For some, this is sightseeing; for others, it´s simply part of "being". For those who love traveling, the question is not simply "when is my next trip?" but also "why can`t I stop?

419. What`s the author`s decription of long-term travelers?

- **A.** People who do not mind handling difficulties.
- **B.** People who only like to travel abroad.
- **C.** People who want to be easily recognized.
- **D.** People who do not feel well away from home.

420. What can the reader find out from the text?

- **A.** People usually travel long distances.
- **B.** Traveling makes people reflect about their lives.
- **C.** Travelers ask themselves why they travel.
- **D.** People should learn how to plan their next trip.

THE OLD COLONEL

I think I have had a very interesting life. I'm 73 now and I don't work anymore. I was in the army for 51 years. I retired when I was 69. I have been to so many countries that I can't remember all of them. I've been to Australia six or seven times and to South Africa three times. I have also been once to Russia but I didn't like it at all: much too cold for me!

I've never been on television, but I've been on the radio once. It was a program about life in the military about twenty years ago. I met the Prime Minister on the same day. Actually, I've met a lot of famous people: members of the royal family, famous politicians and also famous cinema and television personalities. I've never met the American President though which is a pity.

Because I've travelled a lot, I've seen a lot of wonderful things and have also eaten and drunk some strange foods and drinks. I ate cat and rat in India and drank something called Mirto on a little island in Italy many years ago.

BIG BEN

Big Ben is the nickname of the Great Bell of Westminster, the hour bell of the Great Clock, hanging in the Clock Tower of the Palace of Westminster, the home of the Houses of Parliament in the United Kingdom.One theory holds that the bell was named "Big Ben" after Sir Benjamin Hall, the Chief Commissioner of Works. Another theory suggests that at the time anything which was heaviest of its kind was called "Big Ben" after the then-famous prizefighter Benjamin Caunt, making it a natural name for the bell.

Big Ben is commonly taken to be the name of the clock tower itself, but this is incorrect - the tower is simply known as The Clock Tower. Sometimes, the tower is referred to as St. Stephen's Tower, but this title is not used by staff of the Palace of Westminster.The bell weighs 13.8 tonnes (13 tons 10cwt 99lb), with a striking hammer weighing 203.2kg (4cwt), and was originally tuned to E. There is delay of 5 seconds between strikes. It is a common misconception that Big Ben is the heaviest bell in Britain. In fact, it is only the third heaviest, the second heaviest being Great George found at Liverpool Cathedral (14 tons 15cwt 2qr 2lb) and the heaviest being Great Paul found at St Paul's Cathedral (16 tons 14cwt 2qt 19lb). The original tower designs demanded a 14 ton bell to be struck with a 6cwt hammer. A bell was produced by John Warner and Sons in 1856, weighing 16 tons. However, this cracked under test in the Palace Yard. The contract for the bell was then given to the Whitechapel Bell Foundry, who in 1858 re-cast the bell into the 13 ton bell used today. It too started to crack under the 6cwt hammer, and a legal battle arose. After two years of having the Great Bell out of commission, the 6cwt hammer was replaced with a lighter 4cwt hammer, and the bell itself was turned 90 degrees so the crack would not develop any further, coming back into use in 1862. However, the crack, now filled, and the turn meant that it no longer struck a true E.

The belfry also houses four quarter bells which play the Westminster Chimes, derived from Handel's Messiah, in the quarter hours. The C note in the chime is repeated twice in quick succession, faster than the chiming train can draw back the hammers, so the C bell uses two separate hammers.

426. What is the author's intention?

TELEVISION

Life is short! Who has time to waste? Not. If you are really honest with yourself you'll notice that you may be spending too much time on televisión and there are better things you could be doing. Whether you watch televisión or not is your decisión. But consider this first. Some people say TV is educational, but it is an ineffective medium for learning. The average adult spends about: 2 hours a day watching TV. Let's say you lived to age 60; you would have spent 5 years of your life in front of the television. Not only could you be catching up with your family during that time, since watching TV with them it is not real interaction, but you are also preventing yourself from having new experiences. Do you know what you could do with those extra years? Here's some advice: create some art, talk to people, exercise, learn a foreign language or how to play an instrument. Environmental Education

To the editor:

I will mention my position on Environmental Education (EE) in our society.

The ability to work together towards a common goal is absolutely essential and I consider it appears in childhood, when kids get involved in positive experiences. I have personally discovered how nature acts positively in their development. I used to organize expeditions to natural reservations with my son and daughter and we would discover magnificient landscape from which we learned a lot. Those occasions were marvelous.

Vincent Simmons, author of "The Natural Rule", argues how family environmental organizations are a suitable way to get families outside to learn from nature and to consider the importance of protecting the planet. Families are more likely to go to natural spaces if another family arrangers to go with them.

In Simmons' opinion, getting involved in such experiences create suitable conditions for working together, and I agree. Children will feel more comfortable being outside if others their age are involved too. This new approach can also be transferred to schools where children realize the importance of wildlife and its protection. Students will get to actually see the animals and habitats they are learning about in subjects such as biology or science.

Active involvement in EE should be applied in the classrooms because kids will learn better and recognize its real world application so the would be able, for instance, to confirm in what region penguins are normally located. Such involvement may be introduced in academic events aiming at discussing environmental education, so kids could gain more knowledge of how our planet works and what they can do to take care of it.

436. The writer talks about EE in order to

- **A.** explain in what ways kids can protect our planet.
- **B.** describe its advantages on social relationships in children.
- **C.** persuade peoples that this method is good to teach children.
- **D.** encourage students to learn about animals natural environment.

- **B.** EE helps children to get involved in animal life easily.
- **C.** EE is essential for children to understand school programs.
- **D.** students are encouraged to admire nature through EE instruction.

438. The text suggests that in our current world, EE needs

- **A.** more classroom teaching about our planet.
- **B.** parents to be involved in their children's education.
- **C.** more engaged students in our real environment.
- **D.** teachers with essential biology knowledge.

439. What can a reader find out from this text?

- **A.** The effects of nature on parents and children's relationships.
- **B.** The situations in which the project can be carried out.
- **C.** The role of parent involved in environmental groups.
- **D.** The activities families can perform together in excursions.

440. A neat way to recommend this system for teachers would

- **A.** Allow your students to develop a sense of responsability with our planet. Provide them with broad and realistic opportunities to face environmental issues.
- **B.** Enviromental instruction is a recent trend to make your students improve their academic performance in science subjects. Give them that opportunity.
- **C.** An advantage of EE is that kids will employ this knowledge to favor their social demands. Accompany them in this extraordinary action.
- **D.** Encourage the children in your classes to use EE in order to create enviromental organizations. Our planet will thank your effort.

BENEFITS OF EXERCISING

If you want to be healthy and live longer, you must learn about exercising. Recently I have read a lot about this topic and I have put into practice a program, which has improved not only my energy levels but also my feelings.

I strongly recommend that everybody do at least one hour of physical activity everyday because through it, people will have the same benefits.

Exercising helps both body and mind. It makes people feel happy and more peaceful Since starting my exercise program, I can say that I have been sleeping well, and feeling better about myself. SWIFT PIZZA AND SANDWICH HOUSE

Today we have the pleasure of showing you the best letter written by our customer Mark. He wins £25 for writing about us this week. He is so happy with the orders at Swift Pizza and Sandwich House that he wants to declare a holiday to celebrate his experience here: " Happy burgerday and Merry Sandwichmas to everyone!" he wrote.

Wenesday May 18, 2011.

One typical day I was too tired after working all day long to cook for myself, and I was very hungry. I really wanted something to eat, so I decided to find a burger.

I ordered a half-pound burger and a lamb and chicken sandwich. I also had some special requests about extra cheese and vegetables. Food arrived very fast (less than twenty minutes) and was hot and fresh. The burger was delicious, and left me wanting more- fortunately I had the sandwich left. It felt as if it was cut just a minute before I opened it - juicy, fresh, and great.

Every single special request I made was completely satisfied, 100%! And the best thing was that all of the above and some drinks cost me ONLY 10 dollars! If that doesn't say value for money, I don't know what it does. It certainly feels great to find new excellent food delivery companies for whenever you don't feel like cooking yourself. I recently had a sad experience with my usual take away restaurant, so I decided to change to something else - and on my first try I got what I wanted! Order now from Swift Pizza and Sandwich House.

JHONATHAN'S TRIP TO COLOMBIA

I went to Colombia last summer. My Journey began on the Caribbean coast and ended on the border with Ecuador. Colombia is a splendid country, extremely diverse and full of wonderful people. I will tell you why. In south Colombia there is a city called Pereira; just outside you can find a track where you will see the farm Villa Maria - a hidden paradise in the middle of a varelly. Coffe and plantain grow as far as the eye can see. The farm is made up of the house and for just $45,000 a night. This includes 3 home cooked meals a day, a swimming pool, and as much coffee as you can drink, the scene is quite unbelievable. Bamboo chairs rest on the corners of the Villa, mangos hang from the trees, parrots and birds fly wild. A wonderful man named Hector who runs the farm is happy to show guests around the coffee processing plant. By day, the only sounds are of the horses coming down the valley side carrying food. By night, the wildlife comes alive, and depending on the time of the year thunderstorms offer a spectacular light show. Forthose who wish to escape, Villa Maria is the answer.
