Language Tools

Tool	Cómo se usa en un texto	Norma básica	Ejemplo en contexto
Idiomatic expressions *(break the ice, piece of cake, once in a blue moon)*	Expresan ideas culturales que no se entienden palabra por palabra.	No se traducen literalmente; se aprenden como unidad.	*"Learning new words was a **piece of cake.**"*
Cultural markers (greetings, festivals, traditions)	Sitúan el texto en un marco cultural concreto.	Se reconocen por nombres propios o referencias contextuales.	*"During **Thanksgiving,** families gather to share a meal."*
Formal vs. informal register	Refleja relaciones sociales o jerarquías.	Se observa en saludos, títulos, expresiones de cortesía.	*"Dear Sir" vs. "Hey dude"*
Connotation words (home vs. house, cheap vs. affordable)	Palabras con significados emocionales o culturales diferentes.	El contexto define si es positivo o negativo.	*"She lives in a **home"** (calidez) vs. "She lives in a **house"** (neutro).*

Con este repaso final, tu preparación queda completa y lista para el siguiente nivel. Ha llegado el momento de demostrarlo: inicia la Prueba de Campo, donde enfrentarás preguntas tipo Saber 11. Aplica lo aprendido con seguridad y determinación. ¡Mucho éxito en esta misión!

PRUEBA DE CAMPO

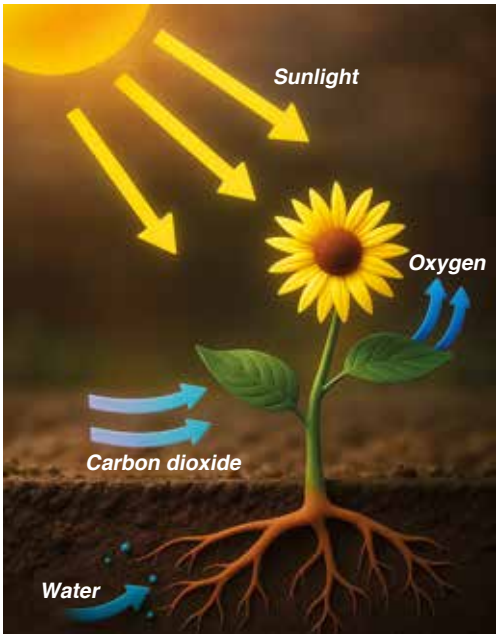

Instrucción

Rellena el círculo que se encuentra al lado de la letra correspondiente a la respuesta correcta. ◯ = ●

Responde las preguntas 1 a 8 de acuerdo con el siguiente texto:

Why Photosynthesis Matters

Many students learn that plants produce oxygen, but not everyone understands how essential this process is for life on Earth. Through photosynthesis, plants take in carbon dioxide and release oxygen, making the air breathable for humans and animals. Without this process, the atmosphere would quickly become toxic, and most species could not survive.

However, photosynthesis is not only about oxygen. Plants also transform sunlight into energy stored in sugars, which then pass through the entire food chain. When a rabbit eats grass, or when a bird eats a fruit, they are receiving energy that originally came from the sun. In this way, photosynthesis is the foundation of almost every ecosystem on the planet.

In recent years, scientists have warned that deforestation and pollution are reducing the number of plants available to carry out photosynthesis. Forests cut down for farming or construction mean less oxygen and fewer natural resources. In cities, air pollution can damage the leaves of trees, making it harder for them to do their work. These problems may seem distant, but they directly affect the quality of the air we breathe and the stability of our climate.

MATERIAL PARA REVISIÓN

For this reason, many schools and communities promote projects such as planting trees, creating green roofs, or protecting local parks. These actions may look small, but together they can improve air quality and fight climate change. Protecting plants is not only about saving nature: it is about protecting our own future.

1. The text implies that human existence is fundamentally dependent on which of the following principles?

- **A.** The successful agricultural domestication of various animal and plant species.
- **B.** The ongoing advancement of humanity's technological and industrial innovations.
- **C.** The intricate and delicate balance of key planetary biological processes.
- **D.** The complete separation of urban environments from natural ecological systems.

2. The author's description of the food chain suggests that energy within an ecosystem:

- **A.** originates from an external source and is then transferred between organisms.
- **B.** is generated primarily by animals through their unique metabolic processes.
- **C.** can be created independently by any organism, regardless of its specific role.
- **D.** decreases in overall importance as it moves from predators down to prey.

3. From the third paragraph, it can be inferred that local human activities, such as deforestation:

- **A.** have consequences that are primarily restricted to their immediate geographic areas.
- **B.** represent a necessary sacrifice for the continued economic development of societies.
- **C.** are generally less impactful to the planet than are most natural geological events.
- **D.** possess the significant capacity to alter large-scale global atmospheric systems.

4. The author's conclusion about "protecting our own future" reframes environmental conservation as:

- **A.** a moral duty focused exclusively on the preservation of a variety of non-human species.
- **B.** an essential and pragmatic strategy for ensuring human survival and long-term well-being.
- **C.** an optional recreational activity for communities with sufficient economic and social resources.
- **D.** an economic burden that inevitably limits industrial progress and necessary societal expansion.

5. By describing photosynthesis as the "foundation of almost every ecosystem," the author implies that it is:

- **A.** a biological process that is important but easily replaceable by other modern energy sources.
- **B.** a biological function that benefits the plant kingdom far more than it benefits animal species.
- **C.** a life-support system whose large-scale disruption would lead to systemic ecological collapse.
- **D.** a natural mechanism that is relevant mainly to the botanical studies of specialized plant life.

6. The text implicitly contrasts the Earth's current, photosynthesis-maintained atmosphere with:

- **A.** a previous or potential atmospheric state that is uninhabitable for complex aerobic life.
- **B.** a hypothetical atmosphere containing much higher levels of oxygen than are present today.
- **C.** a gaseous environment similar to those found on other non-inhabited planets in our solar system.
- **D.** a future atmosphere where advanced technology will fully replace all biological functions.

7. By mentioning the effects of urban pollution on tree leaves, the author primarily illustrates that:

- **A.** the inherent resilience of plants allows them to adapt without issue to any environmental conditions.
- **B.** modern technology has nearly eliminated human dependence on the functions of urban plant life.
- **C.** natural environments and human-built ones operate in completely separate and unrelated spheres.
- **D.** threats to photosynthesis are not just distant problems but occur in our immediate daily lives.

MATERIAL PARA PREVISIÓN

8. The proposal of solutions like "green roofs" suggests a modern approach to sustainability that:

- **A.** prioritizes the reforestation of distant, wild areas over making any significant local improvements.
- **B.** seeks the functional integration of essential ecological processes within human-built landscapes.
- **C.** depends almost exclusively on national policies to implement any sort of meaningful changes.
- **D.** considers the actions of individuals to be largely symbolic but ultimately quite ineffective.

The Power of Street Music

This Photo by Unknown Author is licensed under CC BY-SA-NC

On a busy corner of Medellín, an old man takes out his guitar every afternoon. He doesn't have a stage, just a cracked sidewalk and the shade of a mango tree. At first, people hurry past, worried about traffic or work. But when the first notes of a bolero float in the air, something changes. Pedestrians slow down, a few smile, and someone even records the moment on a phone. For a brief instant, the noise of the city gives way to music.

Street music has always been part of Colombian cities. In Bogotá, young rappers improvise verses about politics or love; in Cartagena, drummers bring echoes of African heritage; in Cali, trumpets and trombones remind everyone of salsa's heartbeat. These performances are not planned concerts but spontaneous acts that connect strangers and remind them of their shared roots.

For many artists, playing in the street is not only about money. It is also about visibility and dignity. A song on the corner can say: "I am here, my story matters." Even without expensive instruments or big stages, street musicians transform public spaces into places of expression. They challenge the idea that art belongs only to theaters or museums.

Some people complain that this kind of music blocks sidewalks or makes too much noise. Others, however, argue that it is exactly this spontaneity that keeps culture alive. Whether it is a bolero, rap, or drums, the truth is that street music speaks of who Colombians are: resilient, creative, and unwilling to let silence define their cities.

1. The text's description of the musician's performance on a "cracked sidewalk" serves to highlight the idea that public spaces:

- **A.** represent significant physical dangers for performers.
- **B.** require municipal funding for artistic development.
- **C.** are inherently unsuited for cultural gatherings.
- **D.** can be redefined and reclaimed by creative expression.

2. The shift in pedestrians' behavior from "hurrying past" to slowing down and smiling suggests that street music's primary social function is to:

- **A.** generate temporary, shared human experiences.
- **B.** provide a structured critique of urban policy.
- **C.** offer a reliable source of income for artists.
- **D.** act as a distraction from workplace duties.

3. By contrasting street performances with formal venues like "theaters or museums", the author primarily advances which argument about the nature of culture?

- **A.** Culture is a dynamic, living phenomenon that thrives authentically in everyday public life.
- **B.** Formal institutions have become obsolete and are no longer relevant in preserving a nation's heritage.

MATERIAL PARA REVISIÓN

C. Street performance is mainly a preliminary training ground for artists aspiring to professional stages.
D. The economic viability of cultural expression depends on moving it away from subsidized institutions.

4. The phrase "I am here, my story matters" is used to imply that street performance is fundamentally an act of:

A. commercial negotiation with the passing audience.
B. personal and cultural affirmation against anonymity.
C. organized protest against government policies.
D. professional ambition aimed at being discovered.

5. The author's concluding statement that Colombians are "unwilling to let silence define their cities" frames street music as a form of:

A. historical preservation of nearly forgotten art forms.
B. simple background entertainment for city dwellers.
C. structured musical education for the population.
D. defiant cultural vitality against urban indifference.

6. By mentioning diverse genres like boleros, rap, and drums, the author emphasizes that street music primarily:

A. appeals exclusively to the younger urban generations.
B. creates intense competition among regional artists.
C. serves as a connection to deep-seated cultural histories.
D. represents a modern rejection of all traditional art.

7. The author introduces the complaint about noise and blocked sidewalks in the final paragraph primarily to:

A. suggest that street music should be more heavily regulated.
B. create a counterargument that is then overcome by a greater ideal.
C. conclude that the negative aspects ultimately outweigh the positive ones.
D. admit that the central issue of the text is far too complex to resolve.

8. The text's contrast between the "noise of the city" and the "notes of a bolero" suggests a thematic tension between:

A. chaotic anonymity and the creation of meaningful connection.
B. rural tranquility and the pressures of urban industry.
C. the value of old traditions and modern musical technology.
D. the struggle of financial poverty and artistic richness.

FINAL DE LA MISIÓN ... CARGANDO DATOS

En esta Misión trabajaste la comprensión inferencial, es decir, la capacidad de leer más allá de lo literal. Aprendiste a reconocer intenciones del autor, identificar mensajes implícitos y descubrir cómo las palabras transmiten emociones, valores y puntos de vista culturales. Este cierre te recuerda que cada texto guarda significados ocultos: no solo lo que dice, sino lo que quiere comunicar. Dominar esta habilidad te prepara para leer de forma crítica en inglés y te conecta con la Misión siguiente, donde continuarás afinando tu criterio lector y tu capacidad de análisis.
